Sylvia, yes, we can help. I just spoke with Vincent.

Water Use permits are good for 20 years and yours, attached, expires on April 25, 2023.

The email was triggered by the sale of the out parcel, and subsequest permit application to SFWMD for the Sheriff Station HQ Annex project by PBC. Our office is actually doing the civil for the architect chosen by PBC for that project.

We will need to "reapply" to SFWMD for a new water use permit with a modified boundary (taking out the parcel) and verification of the pumping systems, locations, volumes, etc. etc. that are currently being used.

Do you want a proposal for this work?

# LAKE BEAUTIFICATION AND ENHANCEMENT TERRACINA

# **Community Development District**

Especially Prepared for: Sylvia Bethel, District Manager. July 21, 2022

Terracina Community Development District

RE: Lake & Littoral Management Agreement

Attention: Sylvia Bethel, District Manager.

Dear Ms. Bethel,

Lakes in South Florida, whether they are man-made or natural, have a life cycle. They start balanced, fresh and clear with natural clean up mechanisms in place. As they age, increased nutrient levels can put the waterway system out of balance, often overwhelming its natural ability to dissipate problems. This often causes weed and excessive algae growth.

Waterway management programs are designed to slow down the aging process and to help prolong the peak period of desirable water quality, clarity and nutrient balance.

Every lake is a unique ecosystem. There is no magical cure for lake problems. It is why it is essential to understand the causes of problems, as well as the effects. By increasing your understanding you'll be able to develop a balanced management program for your lakes.

At your request, we surveyed the waterway system at Terracina located in West Palm Beach, Florida.

- 1. The property has Twelve (12) lakes totaling 49.38 surface acres along with 5.52 acres of Littoral area, in need of environmental resource management.
- 2. Storm water runoff enters the waterway along sodded, sloped banks and underground culverts.
- 3. The lakes are in good condition and are easily assessable for maintenance.

To summarize the aquatic conditions found on our survey:

- a. Shoreline growth includes minimal torpedo grass, cattails and filamentous algae.
- b. Submerged weed growth was minimal at the time of survey.
- c. Shoreline grass growth was minimal and water levels were above control elevation
- d. Aquatic growth in the water can impede flow at drainage culverts.

#### Page 2

- e. Weed growth around irrigation (and fountain) piping exposes expensive pumping equipment to possible damage and unnecessary maintenance expenses due to aquatic weed and algae intake.
- f. Water clarity was poor due to recent heavy rains and construction activities.
- g. Our field observations indicate fish stocking will need to be discussed.

Other observations noted during the survey, which are important to a successful waterway management program are:

- 1. The presence of beneficial shoreline plants are visible at this time but some areas could be aesthetically enhanced by the addition of aquatic plantings. Desirable wetland plant species are important components of a balanced aquatic ecosystem. They provide sanctuary and nesting areas for waterfowl and wildlife, stabilize shorelines, improve water quality and induce greater clarity through filtration. Our firm performs wetland planting services and is licensed to transport and plant native wetland flora.
- 2. The waterway system provides the source of irrigation for lawn maintenance.
- 3. Storm water runoff and fertilization from surrounding turf areas artificially create higher nutrient levels than normal in aquatic systems. This stimulates aquatic plant growth.
- 4. Fountain-type aerators with decorative spray-patterns help to beautify the highly visible waterway while assisting nature with many biological benefits. Our company installs, services and maintains all makes and models of fountains and aerators systems from many manufactures.

It should be noted that the most significant factors that impact lake conditions are oxygen levels in the water, the amount of nutrients contained in the water and water temperature.

A. OXYGEN supports the food chain and provides for a natural way to consume organic matter and undesirable bacteria.

Organic NUTRIENTS are compounds essential to the life of a plant. In water management, these are substances that contain phosphorous and nitrogen (materials found in fertilizers). As nutrient levels rise in lake water, so does algae, and aquatic weed growth, often causing severe problems.

TEMPERATURE differentials in surface and the bottom water of a lake are called thermal stratification. Variations in water temperature cause differences in density. Warm and cold layers do not mix. Warmer surface water induces algae growth. Lake "turnover" which brings oxygen deficient water to the surface is a prime cause of natural fish kills.

#### Page 3

We recommend that this integrated program of waterway management be initiated:

- a. Control and maintenance of the algae. Fertile nutrient run-off entering the water from sodded banks and storm drainage areas will continually stimulate algae growth. Algae blooms often cause odor problems and tend to accumulate along shoreline regions.
- b.Control and maintenance of existing excessive aquatic weeds growing in the waterways.
- c. Scheduled inspections, with treatment as necessary, for the prevention of the development of new undesirable aquatic weed species through introduction by drainage transfer, or other natural processes.
- d.Control and maintenance of the shoreline grasses growing in the water to the water's edge. Some neatly maintained native plants may be left for aesthetic value and wildlife benefit, if they develop.
- e. If desired, beneficial native wetland plants may be added to aesthetically and biologically enhance the aquatic ecosystem.
- f. Additional stocking of the waters with the desirable fish species, bass and bream. SUPERIOR WATERWAY SERVICES provides this optional service.
- g.Research for the stocking of the triploid grass carp and introduction of the gambusia (mosquito fish), to assist in biological weed and mosquito control, will be conducted.
- h. Establishment of a monthly water testing program, especially since waterways may be used for fishing and irrigation.
- i. Establishment of a professional reporting system for property management administration. A sample copy of our comprehensive, monthly report is attached for your review.

Page 4

Enclosed is a contract covering the lake management services you will require. Monthly payments as indicated include visits twice per month with treatment as necessary, management post treatment reports, monthly water testing, and fish stocking of bass and bream, if this option is desired. Kindly sign the original copy of the contract and return it to us so that we may schedule your program.

Our price is predicated on the initiation of lake maintenance before noxious growth develops further. Please note that although we will treat border grasses and brush, certain plants, such as brush, grasses and cattail, leave visible structure, which may take time to decompose.

The installation of an optional fountain/aerator should also be considered.

Aesthetic enhancement and biological benefits that may be expected from your fountain/aerator are:

Increased circulation and destratification. Reduced water stagnation. Increased life-sustaining oxygen for fish populations. Increased oxygen for the improvement of bottom-water quality. Increased oxygen for rapid decomposition of organic sediment. Increased oxygen to help control undesirable bacteria. Creative water display for the evening, with standard lighting patterns. A "healthier" aquatic environment.

The units come in all shapes, sizes and pump capacities. An agreement for this special equipment will be prepared upon request.

Properly managed waterways will maintain water quality and adequate water clarity, while providing an environmental and recreational asset to the property owners at the least cost of maintenance.

We look forward to the opportunity of serving the Terracina Community Development District.

Respectfully yours,

Louís Palermo
